

## CASE STUDY

# Retaining a more sustainable fire tank solution

*ViaCon Lithuania extinguishes higher-cost fire tank solutions to introduce more sustainable, long-lasting alternative*

In 2021, ViaCon steered the installation of a new fire tank in a more affordable, sustainable direction with a WaterCor retention system.

## THE CHALLENGE

How can the construction of a fire tank be made more durable and less expensive? The plans for a retention solution changed direction when it became clear that construction could be both more sustainable and economical. The project required the installation of a 204m<sup>3</sup> fiberglass fire tank in Kaunas, Lithuania.

## STAKEHOLDERS

Investor: UAB „SBA baldų kompanija“

Designer: Mr. Andrius Jarockisv

Product: Watercor Helcor TCx2 D3800mm, t-3.50mm,  
L-18.00m, V-204m<sup>3</sup>

Contractor: UAB „YT Lietuva“

## CORRUGATED STEEL TANK HEADING TO INDUSTRIAL BUILDING IN DROBE ST, KAUNAS

### THE SOLUTION

ViaCon engineers suggested that a WaterCorTank retention tank, made of spiral corrugated HelCor pipes, could serve the purpose more effectively and efficiently than the originally planned distributable reinforced concrete slab material, which was more expensive, had higher production costs and a shorter lifetime.

The result led to:

- Construction from a longer-living, renewable material
- Environmentally friendly construction
- Shorter construction time
- Durable construction for longevity
- Saved costs with shorter construction and lower maintenance

### THE VIACON ADVANTAGE

ViaCon focuses on using renewable materials and more efficient construction for a reduced carbon footprint and the ability to live in harmony with the environment. With ViaCon, the new fire tank water retention solution delivered on its purpose, such as:

- Easy and fast to build, due to simple structure
- Lower maintenance requirements
- Competitive costs, including less energy and fossil fuel consumption during construction
- Steel is 100% recyclable, contributing to the circular economy at end of life
